

The Synetec Growth Accelerator Program

Rapid transformation through technology has never been more exciting!

Synetec work with high growth businesses, and the VCs that fund them, to confront the unknown, move forward and disrupt markets.

Our clients know that to disrupt markets and grow faster than the competition, the design and delivery of 'made to measure' operational software is key. We design software around business' unique processes and create the point of difference that customers and investors crave.

Founders, leaders and investors work with Synetec to create the bespoke operational software that will underpin continued growth and innovation.

THE GROWTH ACCELERATOR PROGRAM

The Growth Accelerator Program (GAP) is designed to build a deep understanding of the operational software needed to deliver short, medium & long term business and technology goals.

The GAP provides the intelligence needed to plan and build bespoke operational systems that will support growth and enhance Innovation. Synetec alleviate operational constraints on CTO's and their talented teams allowing them to focus on front-end product development and getting new and innovative products to market quickly.

ACTIVITIES

- Workshops to understand Short, Medium, Long term business and technology goals
- 'As Is' and 'To Be' assessment of the organisations operational software and systems
- Analyse operational use-cases that bespoke software will improve and support
- Time, Cost and Complexity roadmap for delivering requisite bespoke software
